Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Descriptive	Sheet Metal Cladding
Tech1	over 20,000m2
Tech2	Eaves Height - 45m
Unit size	-
Unit of measurement	m2
ERC	£636
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with insulation on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal insulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power; Gas fuelled hot air burners; Underslab storm drainage from internal downpipes on building area greater than 1,000m2;
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for seperately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	42A10F
Specific	No Wall Cladding
Descriptive	101 - 250m2
Tech1	Eaves Height - 17m
Tech2	-
Unit size	-
Unit of measurement	m2
ERC	£690
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	41T20S
Specific	No Wall Cladding
Descriptive	251 - 500m2
Tech1	Eaves Height - 25m
Tech2	-
Unit size	-
Unit of measurement	m2
ERC	£592
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	42A09E
Specific	No Wall Cladding
Descriptive	0 - 100m2
Tech1	Eaves Height - 32m
Tech2	-
Unit size	-
Unit of measurement	m2
ERC	£879
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

ERC	£528
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	42A09R
Specific	No Wall Cladding
Descriptive	101 - 250m2
Tech1	Eaves Height - 6.5m
Tech2	-
Unit size	-
Unit of measurement	m2
ERC	£664
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Unit size	-
Unit of measurement	m2
ERC	£484
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	42A22T
Specific	No Wall Cladding
Descriptive	101 - 250m2
Tech1	Eaves Height - 41m
Tech2	-
Unit size	-
Unit of measurement	m2
ERC	£788
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Uninsulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; Single phase electrics, lighting and power; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage). Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Superseded codes	41RO8M, 41P345
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Unit of measurement	m2
ERC	£766
Superseded codes	41P281, 41R03G
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Descriptive	Sheet Metal Cladding
Tech1	5,001 - 10,000m2
Tech2	Eaves Height - 13m
Unit size	-
Unit of measurement	m2
ERC	£546
Superseded codes	41P341, 41R09G
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

ERC	£554
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	41P241
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	0 - 100m2
Tech2	Eaves Height - 34m
Unit size	-
Unit of measurement	m2
ERC	£2,071
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	41P503
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	101 - 250m2
Tech2	Eaves Height - 29m
Unit size	-
Unit of measurement	m2
ERC	£1,562
Superseded codes	41P267
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	41P520
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	251 - 500m2
Tech2	Eaves Height - 24m
Unit size	-
Unit of measurement	m2
ERC	£1,003
Superseded codes	41P292, 41RO3U
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	41P530
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	251 - 500m2
Tech2	Eaves Height - 34m
Unit size	-
Unit of measurement	m2
ERC	£1,183
Superseded codes	41P302, 41RR3E
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	41P549
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	501 - 1,000m2
Tech2	Eaves Height - 30m
Unit size	-
Unit of measurement	m2
ERC	£878
Superseded codes	41RR4A, 41P327
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	41P569
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	5,001 - 10,000m2
Tech2	Eaves Height - 25m
Unit size	-
Unit of measurement	m2
ERC	£622
Superseded codes	41P353, 41RO8V
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	41P579
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	5,001 - 10,000m2
Tech2	Eaves Height - 35m
Unit size	-
Unit of measurement	m2
ERC	£649
Superseded codes	41P363, 41RR8F
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	41RR6C
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	1,001 - 5,000m2
Tech2	Eaves Height - 32m
Unit size	-
Unit of measurement	m2
ERC	£730
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Generic Category	Industrial Buildings
CG Code	42A05M
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	10,001 - 20,000m2
Tech2	Eaves Height - 23m
Unit size	-
Unit of measurement	m2
ERC	£596
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Unit of measurement	m2
ERC	£938
Superseded codes	41P03E, 41P23E, 41U23E, 41U43E, 41Z03E, 41Z13E
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-

Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Descriptive	Sheet Metal Cladding
Tech1	251 - 500m2
Tech2	Eaves Height - 6.5m
Unit size	-
Unit of measurement	m2
ERC	£649
Superseded codes	41P04P, 41P24P, 41R02J, 41U24P, 41U44P, 41Z04P, 41Z14P
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Superseded codes	41P08M, 41P28M, 41R08H, 41U28M, 41U48M
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Tech2	Eaves Height - 3m
Unit size	-
Unit of measurement	m2
ERC	£887
Superseded codes	41P00A, 41P20A, 41U20A, 41Z00A, 41Z10A
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Descriptive	Sheet Metal Cladding
Tech1	0 - 100m2
Tech2	Eaves Height - 8.5m
Unit size	-
Unit of measurement	m2
ERC	£1,091
Superseded codes	41P01C, 41P21C, 41U21C, 41Z01C, 41Z11C
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Unit of measurement	m2
ERC	£522
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	42A04V
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	10,001 - 20,000m2
Tech2	Eaves Height - 8.5m
Unit size	-
Unit of measurement	m2
ERC	£511
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Tech2	Eaves Height - 6m
Unit size	-

Back

Unit of measurement	m2
ERC	£465
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an additionusing code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.

Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	1,001 - 5,000m2
Tech2	Eaves Height - 40m
Unit size	-
Unit of measurement	m2
ERC	£781
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00
Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.

The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
Variations	If Cavity Wall construction to lower walls then measure relevant wall area and use code 41P1V1, single block walls are cost neutral. Additional roller shutter doors over and above the beacon specification should be added using code 41P1V2 . Additional personnel doors over the assumed 2no. - add Code 41P1V3. If heating is required an addition using code 41P1V4 (GEA) should be made to the beacon cost. Internal offices (in Industrial complexes) should be added by reference to Cost Guide code series 42P04A - 42P40V, Internal WC - 42P40W

Generic Category	Industrial Buildings
CG Code	41RR8L
Specific	Uninsulated Buildings
Descriptive	Sheet Metal Cladding
Tech1	5,001 - 10,000m2
Tech2	Eaves Height - 40m
Unit size	-
Unit of measurement	m2
ERC	£662
Superseded codes	-
Location factor	Location Adjustment Applicable (See Guidance Notes) - ERC = UK mean of 1.00

Description	Building Area only; Site strip vegetation; Strip foundations; Column bases; Insulated Concrete GF slab with DPM and Mesh,150mm thick up to 10,000m2, 200mm thick over 10,000m2 GEA; Steel Portal frame with bolts and baseplates; Coated galvanised trapezoidal roof sheets with no insulation, on steel purlins; Roof lights; valley gutters; matching fascia and soffit; Rainwater downpipes and gutters; trapezoidal uninsulated wall system cladding on cladding rails; External roller shutter doors and personnel doors; Single phase electrics, lighting and power ; EXCLUDES heating ; Underslab storm drainage from internal downpipes on building area greater than 1,000m2
Referencing details	-
Cost information notes	The data consists of a typical Industrial shell. Works include the Industrial shell as described and includes works up to 1m perimeter to the building (1m wide paving slabs & foul/storm drainage), The cost include 2 no. personnel doors and roller shutters are included at 1 door up to 1,000m2 , 2 roller doors over 1,000m2 (GEA), and 4 roller doors over 5,000m2. Costs are for the shell only and do not include for internal rooms such as offices or toilets which should be added for separately. See Variations for assistance.
rateable element	-
non rateable element	-
Adjusted Plant and Machinery	-
Number of items adjusted	-
Contract size adjustment	(BEAMS Note 2) The ERC for this item should be added to all other rateable items on the hereditament (except land). Therefore the total of the ERC of the other Building Items and the P&M ERC (where applicable) to enable the correct contract size adjustment to be made. ERC of Building Component + ERC of P&M = Total ERC to which contract size adjustment should be applied. The appropriate % adjustment should be made in accordance with the scale for contract size adjustment specified under section 6 of the RCG Guidance notes. The currency ERC rates are set at £4m (Four Million Pounds) @ 1st April (AVD) for the RCG Publication.
